Scatter plot showing the performance of various models on the Hamid-20 dataset. The x-axis represents the number of samples (0.0 to 20.0) and the y-axis represents the performance score (0.0 to 1.0). Three series are plotted: $p=0.1$ (orange), $p=0.5$ (green), and $p=0.9$ (black). The models are labeled with their names and the corresponding p -value. The performance generally increases with the number of samples and the p -value.
