Figure 1: A line plot showing the performance of various models on the Pain dataset. The x-axis is labeled 'pain' and ranges from 0.0 to 20.0. The y-axis represents performance, with a scale from 0.0 to 1.0. Three lines represent different values of p : $p=0.1$ (orange), $p=0.5$ (green), and $p=0.9$ (black). The models are labeled with their names and the value of p . The models are sorted by their performance at $p=0.1$. The legend indicates that the orange line represents $p=0.1$, the green line represents $p=0.5$, and the black line represents $p=0.9$.
